

Kim Diaphragm Valves

KDV - Kim Diaphragm Valves Corporate Profile

focus: flow

# KDV: A Passion for Perfection

KDV – established in Australia in 1979, specialises in the manufacture and distribution of a wide range of industrial valves.

The company's core product group continues to be the range of Kim Diaphragm Valves, now marketed internationally under the KDV brand.

The expansion of the business over the years has seen exponential growth of the KDV product base, which now includes a wide range of both manually operated and automated diaphragm valves.

These products incorporate features now demanded by instrumentation and mechanical engineers from a wide range of industries such as:

- Water treatment
- Mining and Mineral Processing
- Chemical and Fertiliser Production
- Oil and Petrochemical
- Food, Beverage and High Purity
- General Industry

The success of KDV over the years has been primarily built upon product quality, prompt availability and the experience of the KDV team supporting distributors, consultants, designers and end users.

An international network of dedicated KDV flow control specialists ensure that the correct

product is selected and where necessary, individually "tailored" to suit the application.

With the versatility of the KDV diaphragm valve as a cornerstone, the organisation has become a major supplier to many industries – for both major projects and for ongoing maintenance supply contracts.

Interchangeability of KDV components with other internationally recognised products has provided a steady growth in the key area of supply of spares and assembled valves. KDV support this growth with one of the largest stock holdings of spare parts and accessories for diaphragm valves.

A documented quality assurance system in accordance with ISO 9001:2000 underpins KDV's commitment to customer satisfaction.

Around the globe, customers depend on KDV to supply quality products that perform reliably, exceed site standards and meet legislative requirements.

KDV is more than just a brand. It's a promise of quality product and quality support from people who understand your needs.

The cornerstone of KDV's success is the wide range of KDV diaphragm valves. Product features such as a range of body materials, linings and diaphragm materials make the KDV diaphragm valve one of the most versatile products available on the flow control market. This adaptability ensures its presence in a multitude of industries and applications. The KDV specialisation in corrosion and abrasion resistant flow control has seen the product range grow to incorporate other

PFA/PTFE lined valve types including butterfly valves, check valves, plug valves and ball valves. These products when combined with a range of lined pipe and fittings allows KDV to provide more than just diaphragm valves; but total flow control solutions.

This strength is further enhanced with a range of automation options that deliver reliable, cost effective control to automated processes.

The best products deserve the highest level of support. KDV

engineers and distributors have extensive experience in flow control. Their knowledge combined with large inventories of new products, spare parts and accessories all delivered under a system certified to ISO9001 standards brings a formidable product and support package.

Around the globe, KDV products and expertise provide the flow control solutions that deliver the results.

## KDV Valve Types

Flap Check Valve

High Purity Diaphragm Valves

PFA Lined Ball Valves

Plastic Valve Systems

PTFE Lined Valves

## KDV Diaphragm Valve Actuation Options

Pneumatic and Electric Operators

Weir Type compact actuation systems

Actuated diaphragm Valves

Diaphragm control valves

Actuated diaphragm valve

Electrically actuated valves

Power Generation

Mining and Processing

Chemicals and Refining

General Industry
