

SERIES 35 DIAPHRAGM VALVES DN200 WEIR TYPE - GLASS LINED

F-F: EN558-1 Series 1 DIN 3202 F-1

KDV's range of bi directional Weir Type diaphragm valves offer exceptional durability and reliability. The clean design completely isolates line media from the mechanical components of the valve. Bubble tight shutoff (Class VI) and in-line serviceability (top entry) maximise plant efficiency and productivity.

KDV Weir Type diaphragm valves are suited to on-off and control applications and can be custom specified to suit a wide variety of applications.

Contact your KDV technical sales representative to ascertain the correct valve and lining options for your specific application.
